

Good Sound Audiology offers the gift of hearing!

Hearing is often a gift that is taken for granted. The ability to communicate with friends and loved ones and the importance of protecting your hearing cannot be stressed enough. While myself and Dr. Tina Jessee work to provide better hearing every day, we get to emphasize our passion during the month of May for National Better Hearing month.

Good Sound Audiology will be providing free ear protection and introducing your patients to hearing aids that can pair to the new Apple Watch™ in celebration of National Better Hearing month. Dr. Jessee commented, "I get to participate in the most rewarding work I can imagine. For over 20 years I have seen the effects of untreated hearing loss. I have seen the pain and disruptions in marriages. I have seen employees fear for their livelihood. The ongoing reward is when I see the trust and hope develop, and those fears fall away. Providing my patients with better hearing truly is a gift."

There are many causes of hearing loss; however, your patients can reduce their chances of having hearing loss by limiting your exposure to sounds louder than 85 decibels by wearing hearing protection devices such as foam earplugs, earmuffs or electronic protection devices. Walking away from the noise source, turning down the volume, and limiting your time exposed to loud sounds are also strategies to protect your hearing. The gift of better hearing starts by scheduling a hearing evaluation with me or Dr. Jessee and stopping by one of our two locations for hearing protection throughout the month of May.

The gift of better hearing starts with you! Send your patients to Good Sound Audiology for a complete hearing evaluation to begin their road to better hearing. Thank you for allowing us to participate in the care of your patients!
